**SECTION 2 - GENERAL RULES AND REGULATIONS (Cont'd)**

**2.2 MINIMUM PERIOD OF SERVICE**

The minimum period of service is one month except as otherwise provided in this Tariff or as specified in customer contracts. The customer must pay the regular Tariffed rate for the service they subscribe to for the minimum period of service. If a customer disconnects service before the end of the minimum service period, that customer is responsible for paying the regular rates for the remainder of the minimum service period. When the service is moved within the same building, to another building on the same premises, or to a different premises entirely, the period of service at each location is accumulated to calculate if the customer has met the minimum period of service obligation.

If service is terminated before the end of the minimum period of service as a result of condemnation of property, damage to property requiring the premises to be abandoned, or by the death of the customer, the customer is not obligated to pay for service for the remainder of the minimum period.

If service is switched over to a new customer at the same premises after the first month's service, the minimum period of service requirements are assigned to the new customer if the new customer agrees in writing to accept them. For facilities not taken over by the new customer, the original customer is responsible for the remaining payment for the minimum service period in accordance with the terms under which the service was originally furnished.

**3.5.1 Terms and Conditions**

The customer may request an estimate or a firm bid before ordering wire installation work to be done. When an estimate is provided, the estimate is not binding on the Company and the charge to be billed will be based on the actual time and materials charges incurred. **SECTION 4 - SUPPLEMENTAL SERVICES**

**4.1 CENTREX SERVICE**

**4.1.1 General**

The features in this section are made available on an individual basis or as part of multiple feature packages. All features are provided subject to availability; features may not be available with all classes of service. Transmission levels may not be sufficient in all cases.

**4.1.2 Description of Features**

- a. Three Way Conference, Consultation, Transfer: The Three Way Calling feature allows a customer to add a third party to an existing two-way call and form a three-way call. The call must have been originated from outside the station group and terminate to a station within the station group. The Call Hold feature allows a customer to put any in-progress call on hold by flashing the switchhook and dialing a code. This frees the line to allow the customer to make an outgoing call to another number. Only one call per line can be on hold at a time. The third party cannot be added to the original call.
- b. Call Pickup: This feature allows a user to answer any call within an associated preset pickup group. If more than one line in the pickup group has an unanswered incoming call, the call to be answered is selected by the switching system. Call Pickup answers a call that has been directed to another station within the same preset Call Pickup group.

**SECTION 4 - SUPPLEMENTAL SERVICES (Cont'd)**

**4.1 CENTREX SERVICE (Cont'd)**

**4.1.2 Description of Features (Cont'd)**

- c. Call Transfer - All Calls: Call Transfer allows a station user to transfer an established call to another station. The station from which the call is transferred will be assessed any long distance charges incurred as a result of the transfer.
- d. Directed Call Pickup with Barge-In: This feature answers calls directed to a specific line from any other telephone line in the user group.
- e. Directed Call Pickup without Barge-In: This feature is identical to the Directed Call Pickup with Barge-In except, if the line being picked up has already been answered, the party dialing the pickup code is routed to reorder (i.e., fast busy) rather than permitted to barge in on the established connection and create a three-way call.
- f. Distinctive Ringing: This feature enables a user to determine the source of an incoming call from a distinctive ring. The pattern is based on whether the call is from within the station group, external to the station group, forwarded from the attendant position, or from a station within the Call Waiting feature.

**SECTION 4 - SUPPLEMENTAL SERVICES (Cont'd)**

**4.1 CENTREX SERVICE (Cont'd)**

**4.1.2 Description of Features (Cont'd)**

- g. Distinctive Ringing / Call Waiting Tone (Centrex only): This feature applies a distinctive ringing or call waiting tone that enables a user to determine the source of an incoming call. The pattern is based on whether the call is from within the station group, external to the station group, forwarded or extended from the attendant position, or from a station within the Call Waiting feature.
- h. Regular Multiline Hunting: This feature is a line hunting arrangement that provides sequential search of available numbers within a multiline group.
- i. Circular Hunting: This feature (similar to regular hunting) is a line hunting arrangement that allows all lines in a multi-line hunt group (MLHG) to be tested for busy, regardless of the point of entry into the group. When a call is to a line in a MLHG, a regular hunt is performed starting at the station associated with the dialed number. It continues to the last station in the MLHG, then proceeds to the first station in the group and continues to hunt sequentially through the remaining lines in the group. Busy tone is returned if the original called station is reached without finding a station that is idle.

**SECTION 4 - SUPPLEMENTAL SERVICES (Cont'd)**

**4.1 CENTREX SERVICE (Cont'd)**

**4.1.2 Description of Features (Cont'd)**

- a. Speed Calling (Centrex only): This feature allows a user to dial selected numbers using one and two digits. Up to eight telephone numbers may be selected.
- b. Terminal Group and Station Restriction (Centrex only): This feature defines a station's network access capability, either individually within a Centrex group, or for the group as a whole. It defines the Centrex group and what level of access a station will have; i.e. intragroup only, toll restriction, etc.
- c. Series Completion: This feature is a form of hunting similar to the multiline hunt group hunting and the Call Forwarding Busy Line feature. It allows calls to be made to a busy directory number to be routed to another specified directory number. The series completion hunt begins with the originally dialed member of the series completion group, and searches for an idle directory number from the list of directory numbers.
- d. Uniform Call Distribution (Uniform Hunting) (Centrex only): This feature is a hunting arrangement that assigns incoming calls uniformly among the stations in the group.
- e. Account Codes: This feature adds an account number (code) to an Automatic Message Accounting (AMA) and/or Message Detail Recording (MDR) record for assigning customer charges. The Company will define the number of digits in a customer's account code group.
- f. Terminal Group and Station Restriction: This feature defines a station's network access capability either individually within a Centrex group or for the group as a whole. It defines the Centrex group and what level of access a station will have; i.e., intragroup only, toll restriction, etc.

**SECTION 4 - SUPPLEMENTAL SERVICES (Cont'd)**

**4.1 CENTREX SERVICE (Cont'd)**

**4.1.2 Description of Features (Cont'd)**

- g. Uniform Call Distribution (Uniform Hunting): This feature is a hunting arrangement that assigns incoming calls uniformly among the stations in the group.
- h. Call Forwarding: Call Forwarding, when activated, redirects attempted terminating calls to another customer-specific line. The customer may have to activate and deactivate the forwarding function and specify the desired terminating telephone number during each activation procedure. Call originating ability is not affected by Call Forwarding. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the customer with the Call Forwarding is billed for the forwarded leg of the call.
- i. Busy Call Forwarding - automatically reroutes an incoming call to a customer predesignated number when the called number is busy.
- h. Call Forwarding - Don't Answer automatically reroutes an incoming call to a customer predesignated number when the called number does not answer within the number of rings programmed by the Company.
- j. Call Forwarding - Variable allows the customer to choose to reroute incoming calls to another specified telephone number. The customer must activate and deactivate this feature.
- k. Call Waiting/Cancel Call Waiting: Call Waiting provides a tone signal to indicate to a customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the customer disconnects from the call.

**6.2. SERVICE DESCRIPTIONS AND RATES (Cont'd)**

**6.2.7 Asymmetrical Digital Subscriber Line (Cont'd)**

The connection point is the aggregation point designated by the Company for connecting multiple Company ADSL serving wire centers via the backbone network services to the CDL.

A nonrecurring charge and a monthly rate apply for the installation of ADSL Service. The nonrecurring charge is also applicable when changing bandwidth.

ADSL Service is based on the following volume levels: 1 to 499, 500 to 1500 and Over 1500. The regulations applicable to ADSL Service provided under a TVP arrangement are specified under 16.6(F)(3). Various ADSL Service Package levels (will be combined to determined the volume level for rate application. Customers with more than one ADSL Service with different term periods will not be aggregated for determining the volume level rate.

Access to ADSL Service will be provided via Frame Relay Service. The associated regulations, rates and charges in Section 11 for Frame Relay Service will apply in addition to the rates and charges associated with the ADSL Service rate element.

**6.2.8 Frame Relay Service**

- A. General Description: XCLUTEL Frame Relay is a low to medium speed, statistically multiplexed packet data service. It is a connection-oriented data service that relays variable length frames (packets) across Permanent Virtual Connections (PVC's). Frame Relay service is subject to availability.

**SECTION 6 - BUSINESS NETWORK SWITCHED SERVICES (Cont'd)**

**6.2 SERVICE DESCRIPTIONS AND RATES (Cont'd)**

**6.2.8 Frame Relay Service (Cont'd)**

XCLUTEL Network Services Frame Relay is available to customers through the following:

- User-to-Network Interface (UNI) Connection
- Network-to-Network Interface (NNI) Connection
- Hubbed User-to-Network interface (H UNI) Connection
- Hubbed Network-to-Network Interface (H NNI) Connection
- Permanent Virtual Connections (PVC)

The service is comprised of two public interfaces-, a User-to-Network Interface (UNI) and a Network-to-Network Interface (NNI).

- (1) The UNI is a public interface which provides connectivity between customer premises equipment, excluding frame relay switches, and a frame relay switch.
- (2) The NNI is a public interface which provides connectivity between frame relay switches.
- (3) PVC's are the end-to-end, bi-directional, logical channels that connect one frame relay switch port to another frame relay switch port as requested by the customer.

XCLUTEL Network's Frame Relay UNI Connections and NNI Connections are available to customers from designated Frame Relay Service Points (FRSPs) at locations specified in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. Hubbed UNI Connections are available to customer from designated Frame Relay Service Access Points (FRSAPs) at locations specified in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

Hubbed NNI Connections are available to customers from designated Frame Relay Service Access Points (FRSAPs) at locations specified in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

**SECTION 6 - BUSINESS NETWORK SWITCHED SERVICES (Cont'd)**

**6.2 SERVICE DESCRIPTIONS AND RATES (Cont'd)**

The dedicated channel which connects a customer's premises to an FRSP will be rated as a Local Distribution Channel (LDC). When the customer's serving wire center is not a designated FRSP location, Channel Mileage Termination (GMT) and Channel Mileage (CM) will apply from the customer's serving Wire center to the closest FRSP. Optional Features and Functions are also available with their channels and transport facilities.

When the customer requests either a Hubbed UNI Connection or a Hubbed NNI(C) Connection, the customer must obtain the appropriate dedicated channel between their premises and the closest FRSAP. The customer must provide the Connecting Facility Assignment (CFA) to the Telephone Company at either a DSO level or at the appropriate interface level in the case of higher speed multiplexing. Either a Hubbed UNI Connection Cross-connect or a Hubbed NNI Connection Cross-connect will apply to each dedicated channel connected at the FRSAP.

When utilizing XCLUTEL Networks DS1 Service as a component in XCLUTEL Networks Frame Relay, it must be ordered with the "Clear Channel Capability" option.

**B. Service Elements**

- (1) Committed Information Rate (CIR): CIR represents the base-level bandwidth on a specific DLCI by which the data is sent through the network. This bit rate is lower than or equal to the bit rate of the associated UNI or NNI connection and allows customers to reserve bandwidth on a per DLCI basis in order to prioritize critical data.
- (2) Data Link Connection Identifier (DLCI): A DLCI is the address information assigned to customer designated and points used to identify a customer's PVC and to correctly route customer's data between end locations.

B. Service Elements (Cont'd)

- (3) Permanent Virtual Connections (PVCs): PVCs. are the end-to-end, bi-directional logical channels that connect UNIs or NNIs within the XCLUTEL Networks Frame Relay network as requested by the customer. PVC's are made up of two Data Link Connection Identifiers (DLCIs). Multiple PVC's can be established over a single physical access circuit, providing a single access line the capability to transmit data to multiple destinations. PVC's are defined in software tables and do not tie-up capacity when not in use.
- (4) Oversubscription: Oversubscription allows the cumulative total Committed Information Rate of the DLCIs associated with single UNIs or NNIs to exceed the bit rate of that UNI or NNI. When this occurs, there is no guarantee that the bandwidth defined for any DLCI will be available at any given time.

C. Additions to Frame Relay Serving Arrangements: A subsequent order to add additional connections to an existing frame relay arrangement must be for a period of 12, 36 or 60 months or for the remainder of the existing Frame Relay OPP provided that the existing OPP has a minimum of 12 months remaining.

The dollar difference between the current OPP rate for the OPP term that could have been completed during the time the service was actually in service, or the entire 12 month OPP rate for a service in place less than 12 months, and the customers current OPP rate for each month the service was provided.

For example, a customer subscribed to a 60 month OPP term and disconnected service during the 37th month. This customer's termination charge would be:  $[35 \text{ month OPP Rate} - 60 \text{ month OPP rate}] \times 37 = \text{Termination Charge}$ . **SECTION 7 - INTRALATA TOLL USAGE AND MILEAGE CHARGES**

**7.1 GENERAL**

**7.1.1 Description**

Intra-LATA toll service is furnished for communication between telephones in different local calling areas within a particular LATA in accordance with the regulations and schedules of charges specified in this Tariff. The toll service charges specified in this section are in payment for all service furnished between the calling and called telephone, except as otherwise provided in this Tariff.

Intra-LATA toll calling includes the following types of calls: direct dialed, calling card, collect, 3rd number billed, special toll billing, requests to notify of time and charges, person to person calling and other station to station calls.

**7.1.2 Classes of Calls**

Service is offered as two classes: station to station calling and person to person calling.

- a. Station-to-Station Service is that service where the person originating the call dials the telephone number desired or gives the Company operator the telephone number of the desired telephone station or system.
- b. Person to Person Service is that service where the person originating the call specifies to the Company operator a particular person to be reached, a particular mobile unit to be reached, or a particular station, department or office to be reached. The call remains a person to person call when, after the telephone, mobile telephone, or PBX system has been reached and while the connection remains established, the person originating the call requests or agrees to talk to any person other than the person specified, or to any other agreed upon alternate.

**SECTION 7 - INTRALATA TOLL USAGE AND MILEAGE CHARGES (Cont'd)****7.2 TIMING OF CALLS**

- a. Unless otherwise indicated, all calls are timed in one minute increments and all calls which are fractions of a minute are rounded up to the next whole minute.
- b. For station to station calls, call timing begins when a connection is established between the calling telephone and the called telephone station.
- c. For person to person calls, call timing begins when connection is established between the calling person and the particular person, station or mobile unit specified or an agreed alternate.
- d. Call timing ends when the calling station "hangs up," thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.
- e. Calls originating in one time period as defined in Section 7.3 and terminating in another will be billed the rates in effect at the beginning of each minute.
- f. All times refer to local time.

**7.4 REGULATIONS AND COMPUTATION OF MILEAGE (Cont'd)**

**7.4.2 Terminating Rate Center**

The terminating point for all calls shall be the location of the local rate center associated with the called number.

**7.4.3 Calculation of Mileage**

Usage charges for all mileage sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call. The serving wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between any two rate centers is determined as follows:

Airline mileage, where mileage is the basis for rating calls, is obtained by using the "V" and "H" coordinates assigned to each rate center and contained in NECA FCC Tariff No. 4 or successor Tariffs. To determine the airline distance between any two locations, proceed as follows:

- a. Obtain the "V" and "H" coordinates for each location. The "V" coordinate is the first four digits in the "VH" column. The "H" coordinate is the next four digits.
- b. Obtain the difference between the "V" coordinates of each of the locations. Obtain the difference between the "H" coordinates.
- c. Square each difference obtained in step b., above.
- d. Add the square of the "V" difference and the "H" difference obtained in step c., above.
- e. Divide the sum of the square by 10. Round to the next higher whole number if any fraction is obtained.
- f. Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

In addition, where live or automated operator assistance is required for call completion or billing, a per call service applies.

Charges for all classes of calls may be to the calling station, to the called station when the called party agrees to accept the charges, to an authorized telephone number which is not the called station or the calling station (3rd number billing), or to an authorized calling card.

The E911 calling party, by dialing 911, waives the privacy afforded by non-listed and non-published service to the extent that the telephone number ("ANI") and address ("ALI") associated with the originating station location are furnished to the PSAP, on a call by call basis, after an E911 call has been received.
- e. Service boundaries of the Company and political subdivision boundaries may not coincide. In the event that the Agency does not subscribe to Selective Routing, it must make arrangements to handle all 911 calls that originate from telephones served by Central offices in the local service areas (i.e., exchange) whether or not the calling telephone is situated on property within the geographical boundaries of the Agency's public safety jurisdiction.

**SECTION 10 - DIRECTORY (Cont'd)**

**10.1 ALPHABETICAL DIRECTORY (Cont'd)**

**10.1.3 Types of Listings (Cont'd)**

- a. Indented Listings: An indented listing is indented under a standard listing or under a caption, and may not include more than a designation, address, and telephone number. A caption consists of a name, and may include a designation, but not a telephone number. An address may be included only if all of the services listed under the caption are located at the same address. When the same designation is appropriate for two or more indented listings, it may be shown as a sub-caption.

Indented listings are permissible when a Customer is entitled to two or more listings of the same name with different addresses or different telephone numbers.

- b. Duplicate Listings: Any listing may be duplicated in a different directory (where offered) or under a separate geographical heading in the same directory. Such listing may be duplicated in indented form.
- c. Reference Listing: A Customer with a listing in a different geographic heading may have an indented listing in reference form ("See . . .") in lieu of a duplicate listing.
- d. Cross Reference Listing: A Customer may have a related listing in the same alphabetic group listing when required for identification of the listed party and not designated for advertising purposes.
- e. Alternate Telephone Number Listings: Any listed party who has made arrangements for receiving calls at a different telephone number during an absence or at night may have the alternate numbers listed in the directory. Such listings may be furnished as an indented listing or as a sub-caption.
- f. Semi-Private Listing: At the request of the Customer, the telephone number is omitted from the Company's alphabetical directory and designated as a "non-listed" telephone number and the telephone number is included in the Directory Assistance records available to the general public. In addition, the telephone number is displayed for 911 and E911 emergency service and provided when a law enforcement agency requests it in writing.

**SECTION 10 - DIRECTORY (Cont'd)**

**10.1 ALPHABETICAL DIRECTORY (Cont'd)**

**10.1.4 Non-Published Service**

- a. General: The telephone numbers of non-published service are not listed in either the Company's alphabetical directory or Directory Assistance records available to the general public. However, where a government agency subscribes to Universal Emergency Telephone Number Service (911) or Enhanced Universal Emergency Telephone Service (E911), the telephone number, name, and address of a Customer with non-published service will be displayed when the Customer dials 911 and is connected to a Public Safety Answering Point (PSAP) for dispatch of emergency service. In addition, the Company will provide a Customer's non-published number when a law enforcement agency requests it in writing.
- b. Regulations:
  1. Except as otherwise provided in this paragraph, incoming calls to non-published service will be completed only when the calling party places the call by number. In claims of emergencies involving life and death, the operator will call the non-published number and request permission to make an immediate connection to the calling party. If the connection is refused, the calling party will be advised.
  2. The acceptance by the Company of the Customer's request to refrain from publishing his or her telephone number in the Directory does not create any relationship or obligation, direct or indirect, to any person other than the Customer.
  3. In the absence of gross negligence or willful misconduct, no liability for damages arising from publishing the telephone number of non-published service in the directory or disclosing said number to any person shall attach to the Company, and where such a number is published in the directory, the Company's liability shall be limited to and satisfied by a refund of any monthly charges which the Company may have made for such non-published service.
  4. The Customer indemnifies and saves the Company harmless against any and all claims for damages caused or claimed to have been caused, directly, by the publication of the number of a non-published service or the disclosing of said number to any person.

An allowance for errors in published directory listings or for errors in listings obtainable from the Directory Assistance operator shall be given as follows:

- a. Free Listings: For Free or non-charge published directory listings, credit shall be given at the rate of two times the monthly rate for an additional or charge listing affected, for each month of the life of the directory or the charge period during which the error occurs. The Company may issue the credit in a lump sum if it chooses to do so.
- b. Charge Listings: For each additional or charge published directory listing, credit shall be given at the monthly Tariff rate for each individual line affected, for each month of the life of the directory or the charge period during which the error occurs.
- c. Operator Records: For free or charge listings obtainable from records used by the Directory Assistance operator, upon notification to the Company of the error in such records by the Customer, the Company shall be allowed a period of three business days to make the correction. If the correction is not made in that time for reasons within the control of the Company, credit shall be given at the rate of two-thirtieths (2/30) of the basic monthly rate for the line or lines in question for each day thereafter that the records remain uncorrected. The total amount of any credit shall not exceed, on a monthly basis, the total of the charges for each listing plus the basic monthly rate for the line(s) in question.
