LINES FOR YOUR OWN VOICE BOT

Give your AI bot a real phone number

CloudX Bot Line is a CloudX extension made for a voice bot you run yourself. Calls reach your bot, and your bot can place calls from your number.

BUILT FOR

- Companies running their own voice bot
- Engineers connecting a bot to real calls
- Teams needing no SIP server for a bot

Connect by web address

Your bot connects over a secure WebSocket. You run no SIP server and open no firewall ports for audio.

XCLUTEL sets it up

You send your bot's details and the number it answers. XCLUTEL connects it and runs a test call with you.

Safe by design

A signing key lets your bot refuse any connection that is not ours. Emergency and service numbers are always refused.

Never a dead line

If your bot does not accept the connection within 3 seconds, the call goes to the fallback you choose.

WHAT YOU GET

Everything in CloudX Bot Line

- Its own CloudX extension
- Answers on your CloudX number
- Inbound and outbound calls
- Secure WebSocket connection
- Signed connections
- No SIP server to run
- Two way streaming audio
- Fallback if the bot is down
- Do not call list kept
- Each number is its own line
- 500 minutes pooled per line
- Sold alone, no Agent Console needed

GETTING STARTED

XCLUTEL handles it, start to finish

1

Send your bot details

Send the secure bot address, the number it answers, a fallback and a technical contact.

2

XCLUTEL connects it

XCLUTEL connects the line and gives you a signing key by secure handoff, never by email.

3

Test before live

Run a test call with XCLUTEL. Check calls in, calls out and clean hang up from both sides.

WORKS WELL WITH

CloudX | XCLUTEL Agent Console

One call, one desk, handled.

Talk to your XCLUTEL rep about a design and quote for your business. Ask about pricing for your setup.
