xclutel COMMUNICATIONS

INTERNET AND PRIVATE CIRCUITS

The right circuit for every site

XCLUTEL is carrier neutral. We design access for each site, source it from whichever carrier fits, and support it all from one desk on one invoice.

BUILT FOR

- Multi site businesses with mixed carriers
- Offices that cannot afford downtime
- Companies planning an office move

Carrier neutral

XCLUTEL does not own a network, so it has no reason to sell you the wrong circuit. It sources from whichever carrier serves the address.

Designed per site

An engineer looks at what each location runs, how many people work there, and what happens if it goes dark.

Failover planned early

Diverse paths and pre staged disaster recovery call routing are part of the design, not an add on.

One desk, one invoice

XCLUTEL manages the install and the carrier on your behalf. Every circuit shares one invoice and one support number.

WHAT YOU GET

Everything in Internet Access and Private Circuits

- Dedicated fiber
- Business broadband
- Fixed wireless
- Private transport
- Point to point circuits
- MPLS and Ethernet between sites
- Carrier hotel interconnection
- SIP trunks and PRI circuits
- Analog POTS lines
- Cellular backup
- Diverse multi site paths
- Structured cabling
- Office move project management
- 24×7 monitoring by XCLU-Care

GETTING STARTED

XCLUTEL handles it, start to finish

1

Tell us your sites

Send the addresses and what runs at each one. An engineer designs the access layer per site.

2

XCLUTEL sources circuits

XCLUTEL orders from the carriers that serve each address and manages the install and the carrier for you.

3

We watch it 24x7

XCLU-Care monitors every circuit around the clock, drives carrier tickets and escalates to engineers who know you.

WORKS WELL WITH

SD-WAN and Security

CloudX

One call, one desk, handled.

Talk to your XCLUTEL rep about a design and quote for your business. Ask about pricing for your setup.
